My woodworking background and passion for building beautiful things lead me to fall in love with web programming. I find joy in planning, testing, and experimenting with new tools and technologies - I am currently seeking a front-end junior position where I can demonstrate my broad range of skills and creative approach to problem-solving.

PROFESSIONAL EXPERIENCE

Full-Stack Developer Intern Altooro (Feb-April 2022)
Developed new features and enhanced existing ones to the microservice architecture platform using **TypeScript**, **React**, **NextJs** and **Material-UI**. Enabled users to link their personal **GitHub** accounts using **OAuth 2**.

Full-Stack Developer Bootcamp Appleseed Academy (2021-2022)
An intensive 6-months training program. I learned front-end skills such as **HTML, CSS, JavaScript, React**, and back-end skills such as **NodeJs** and **MongoDB** database.

Final project- Used **React** and **NodeJS** to create a book database where users can be **Authenticated**, register books, search through catalogs, create a reading list, and get recommendations based on previous searches.

Mid project - A **React** crime app, making calls to the FBI crime database and Most Wanted **API**s using **Axios**. Used **CRUD** methods to manage user accounts.

 CNC Lead and Cabinetmaker - Madatech, **National Museum of Science Technology and Space**, Haifa, Israel (2014-2020)
I planned, created 3D files for production (using computer graphics programs), and was responsible for machine operation and maintenance.
